Pa Debbie:

Cox's contractor has spilled some sludge and unknown chemicals (acidity-high).

They waited a long time before they called he they try to get some pumping contractor to pump it - but he refuses due to acidity.

They graded the spill area - F&G is ticked. The Board may think we have condoned it.

Tom & Brian are involved. She has taken lots pic's.

They have been on the property w/ ROE from (Property Services / Airport?)

They said pu staff to let them they could do the work!!

City has changed the lock, but they broke the lock.

Tom has been handling the issue.
